DEPARTMENT

Re: Gasoline Spill at Midwest Carport Carriers

At approximately 3:30 P.M. on August 26, 1984, I received a page from the Fire Department stating that there had been a gasoline spill at Midwest Carport Carriers, located at National & Division. Upon investigation it was found to be 10 gallons of gasoline at the very most. Apparently one of Midwest's trucks had set out in the sun and the gasoline in its tank expanded and leaked out. Midwest called the Fire Dept. because they were scared to start their truck for fear of an explosion.

The truck was parked on a chip and sealed parking lot. The gasoline traveled approximately 1.5'-2.0' to a storm grate. The gasoline did not flow out of the storm collection box on Midwest's property. Dirt was used to absorb what little gasoline that was present in the storm collection box.

I contacted Mr. Dade W. Smith, General Mgr. for Midwest Carport Carriers, and informed him that there was no need to report the spill since it did not leave their property.
